

# ram 201

## PRODUCT DESCRIPTION

**ram 201** is a high performance modified sheet applicable for use in many **ram-Tough** systems. Two common applications are as a vapor retarder system and a protection course in **ram-Tough** 250 applications.

**ram 201** is manufactured by coating a high tensile fiberglass reinforcing mat with a SBS modified bitumen coating. Production is carefully controlled to assure uniform distribution of the elastic waterproofing bitumen.

### Physical Properties

<u>Test</u>	<u>Method</u>	<u>Typical Results</u>
Weight	ASTM-D-461	min 25 lbs/100 sq ft
Asphalt Softening Point	ASTM-D-36	220°F - 250°F
Asphalt Penetration	ASTM-D-5	15 - 20 dmm
Roll Size		3 square
Roll Weight		75 lbs/roll
Surfacing & Surface Stabilizer max	ASTM-D-4601-86	65%
