

ram 306

PRODUCT DESCRIPTION

ram 306 is a polyester reinforced SBS Kraton Modified Bitumen membrane sheet with a ceramic granule surface. It is designed for hot bitumen applications. It is not an appropriate product for torch flame application.

ram 306 complies with ASTM-D-6164 Type I, Grade G requirements.

USES

With **ram-Tough BUR** and **ram-Tough Waterproofing Systems**, for all weather-exposed flashings, including wall flashings. Also used as a cap sheet with asphalt built-up roofs. Material has excellent adaptability to extreme temperature ranges, good UV resistance, and good puncture resistance. RAM 306 is 100% compatible with **ram-Tough** modified bitumens.

Performance

Thickness	ASTM-D-5147	4.0 mm
Breaking Strength	ASTM-D-412	119 pounds per inch MD 88 pounds per inch XD
Elongation @ 0°F	ASTM-D-412	50%
Cold Bend	ASTM-D-5147	-10°F
Tear Strength	ASTM-D-5147	55 lbf

Packaging

Roll Size	33 feet x 39 inches (one square)
Weight	105 pounds per roll
