

# ram Ultra-White

## PRODUCT DESCRIPTION

**ram** Ultra-White is a one-component latex based elastomeric reflective roof water-based emulsion of excellent color stability, weatherability and flexibility.

## APPLICATION

**ram** Ultra-White should be power mixed before application. Apply by brush or spray. Apply in two coats. Drying speed is such that it should be possible to apply the second coat (finish coat) on any normal size area before moving equipment to a new spot. Apply at a total rate of 4 gallons per square, applying 2 gallons per square each coat. If possible, second coat should be applied at right angles to first coat.

## PREPARATION

**ram** Ultra-White may be applied to asphalt, concrete, metal and wood surfaces. Base must be clean and free of oil, grease, dust and all materials that might reduce adhesion. Asphalt emulsion systems may be coated when dry. Solvent based asphalts must be at least six months old and totally free of residual solvent.

All asphaltic surfaces must be prime coated with RAM Ultra-White Primer prior to installation of RAM Ultra-White.
