

Greenroof-Roofscapes®

Roofscape® Edge+

DESCRIPTION

Roofscape® Edge+ is designed as a definite boundary between gravel/paver and growth media that allows the flow of water but not of the substrate. Specific to this product, it:

- Utilizes a **"smooth slide" design** to make secure, invisible connections
- Has **prefabricated corners** for ease of installation.
- **Prevents overly moist media conditions** around the perimeter or in transition areas of the roof, thus preventing anaerobic growing conditions.

	SIZE	DIMENSIONS
FEMALE	9"	96" x 6" x 9"
	12"	96" x 6" x 12"
MALE	9"	12" x 5.675" x 8.675"
	12"	12" x 5.675" x 11.675"
CORNER 1	9"	12" x 5.675" x 8.675"
	12"	12" x 5.675" x 11.675"
CORNER 2	9"	12" x 5.675" x 8.675"
	12"	12" x 5.675" x 11.675"

USES

- Semi-Intensive vegetated roofs.

INSTALLATION

- Lay edge profile sections end to end on top of protective fleece, with 1' of restraint toward vegetative portion of roof.
- Slide Male Clips into Female Lengths.
- Connect all components as shown on edging plan.

PACKAGING

9" Metal Edge

- 10 Lengths & Clips (80')
- 100 Lengths & Clips per Pallet

12" Metal Edge

- 10 Lengths & Clips (80')
- 80 Lengths & Clips per Pallet
