

# ROOFSCAPES® TerraPAVE™

## Concrete Architectural Deck Paver System

### Description

Terra-PAVE™ architectural deck pavers are high-density, precast concrete paver and pedestal assemblies engineered for superior durability and aesthetic versatility in commercial and high-end residential projects. They offer high compressive strength (>8,000 PSI) and are available in a variety of colors, sizes, and textured finishes to fit any outdoor space.

With unmatched performance, aesthetic, and variety, Barrett's Terra-PAVE™ architectural deck paver systems are guaranteed to deliver premium quality and a pristine finish for plazas, rooftop decks, walkways, patios, and more. Contact Barrett for a complete list of pavers and pedestal options to enhance your next project.

### Benefits

- Natural stone or modern, clean looks
- Excellent durability and freeze-thaw resistance
- Available in a wide range of colors, finishes, styles, and sizes
- Standard sand-set and rooftop paving pedestal assemblies
- Backed by a Barrett Complete Single Source Warranty

### Custom Colors, Sizes, and Finishes

Barrett has partnered with the industry's top manufacturers and suppliers to provide both national and regional options for our Terra-PAVE™ architectural paver assemblies. With a wide selection of finishes, colors, sizes, and performance features, designers and building owners can feel confident they've chosen the right solution for their project.

### LEED® Compliance

For projects pursuing sustainable design strategies or aiming to earn LEED™ credits, certain paver options offer a Solar Reflectance Index (SRI) greater than 82. To qualify for roof-related credits, these pavers must cover at least 75% of the roof area. For non-roof credits, they need to be installed across a minimum of 50% of all non-roof impervious surfaces.

### Barrett Single-Source System Warranty

Our joint agreements with some of the industry's top suppliers of pavers, insulation, growing media, and more allows us to offer a Complete Single Source Warranty with the flexibility to choose products based on individual project needs and specifications, custom-building a system without being limited to a single product offering.

### Uses

- Rooftops
- Amenity decks
- Plaza decks
- Patios
- Walkways

### Manufacturers

- Hanover Architectural Products
- Wausau Tile
- Westile Pavers
- Nitterhouse Masonry Products
