TerraPLANK™

Wood Tile Deck Paver System

Description

Terra-PLANK™ wood tiles are modular, durable, and weather-resistant hardwood pavers designed to create elevated, pedestrian-friendly, and stylish decks on flat or low-slope roofs and plaza decks. Available in standalone and paver-pedestal assemblies, they provide a warm, natural aesthetic compared to concrete and offer benefits like easy drainage, durability, and fire resistance.

With unmatched performance, aesthetic, and variety, Barrett's Terra-PLANK™ wood tile systems are guaranteed to deliver premium quality and a pristine finish for plazas, rooftop decks, walkways, patios, and more. Contact Barrett for a complete list of pavers and pedestal options to enhance your next project.

Benefits

- Natural stone or modern, clean looks
- Excellent durability and freeze-thaw resistance
- Available in a wide range of colors, finishes, styles, and sizes
- Standard sand-set and rooftop paving pedestal assemblies
- Backed by a Barrett Complete Single Source Warranty

Warm Aesthetic + Cool Performance

Terra-PLANK™ wood tiles instantly elevate a space, creating a warm, high-end look that's difficult to replicate with concrete or stone. Wood also stays cooler underfoot than many hardscape materials like concrete or stone, improving user comfort in sun-exposed environments—especially important for rooftop amenity spaces.

Easy Installation & Maintenance

Most Terra-PLANK™ systems are modular or pedestal-based, allowing for quick installation without adhesives or major structural modifications. This reduces labor time and makes them ideal for retrofit or renovation projects. Because the tiles are modular and removable, maintenance teams can also easily access drains, membranes, or utilities below the surface—saving time and cost compared to permanent systems.

Barrett Single-Source System Warranty

Our joint agreements with some of the industry's top suppliers of pavers, insulation, growing media, and more allows us to offer a Complete Single Source Warranty with the flexibility to choose products based on individual project needs and specifications, custom-building a system without being limited to a single product offering.

Uses

- Rooftops
- Amenity decks
- Plaza decks
- Patios & terraces
- Walkways

Manufacturers

- Bison Innovative Products*
- Unilock
- Siplast
- Greenrise Technologies*

*Must use corresponding pedestal accessories during installation
