

ROOFSCAPES®

TerraCURB™

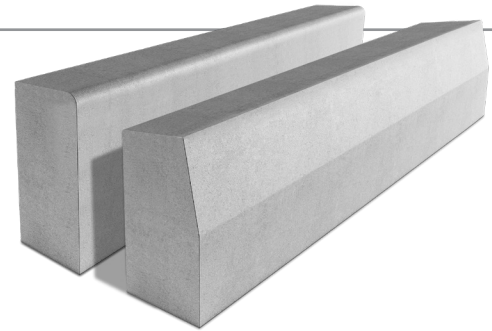

Concrete Landscape Curbing System

Description

Terra-CURB™ is a hydraulically pressed precast concrete curbing system designed for use as transition units between the softscape of a Terra-SCAPES™ green roof assembly and the hardscape of a Plaza-SCAPES™ assembly, or anywhere precast curbs are desired. The curbing is available in a variety of colors, sizes, and textured finishes to fit any outdoor space. Only the top and front faces of the unit are finished; the backside and end faces are not finished.

With unmatched performance, aesthetic, and variety, Barrett's Terra-CURB™ concrete curbing system is guaranteed to deliver premium quality and a pristine finish for plazas, rooftop decks, walkways, patios, and more. Contact Barrett for a complete list of curbing options to enhance your next project.

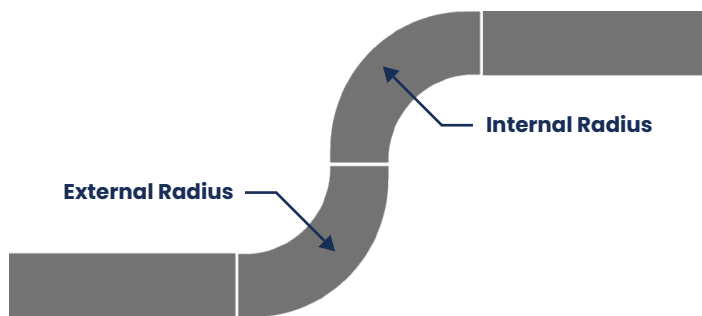

Uses

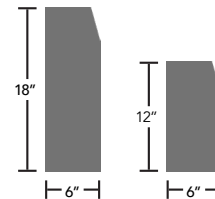

- Rooftops
- Amenity decks
- Plaza decks
- Patios & terraces
- Walkways

Benefits

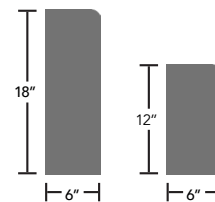

- Significantly more durable than poured-in-place curbing
- Radius and Transition units allow for complex configuration
- Available in a variety of colors and textures
- System can be easily reconfigured and reinstalled to accommodate maintenance or repairs
- Edge conditions include battered, bullnose, and rounded
- 1/8" joint is recommended to allow for freeze-thaw expansion
- Backed by a Barrett Complete Single Source Warranty

Battered

Bullnose

Rounded

Specifications

Terra-CURB™ is available in 8" (20.32 cm), 12" (30.48 cm), and 18" (45.72 cm) tall curbs. Each piece is 6" (15.24 cm) wide and 36" (91.44 cm) in length.

Terra-CURB™ Straight

Terra-CURB™ Straight are 36" long and 6" thick with a 12" or 18" height. Both heights are available in Battered and Bullnose Profiles. Terra-CURB™ units are consistent in size and many times more durable than poured-in-place curbing. The units can be easily reconfigured and reinstalled to accommodate changes or repairs.

Terra-CURB™ Radius

Terra-CURB™ Radius sections can be used when the project incorporates curves. Gentle arches or circles can be accommodated by using a combination of radii and straight sections. A complete selection of internal and external radii is available with either a 12" or 18" height in two profiles.

Terra-CURB™ Transition

Terra-CURB™ Transition is manufactured in 3 distinct shapes to allow the transition from a full height curb to the appropriate level needed for an entrance or drive. The Left and Right Transition Sections reduce the height, while the Center Transition Section provides the opening. Center Transitions can be used in multiples to allow any size driveway width.

Properties
