

ROOFSCAPES® Seed Mix

Pre-Grown Sedum Vegetation Blanket

Description

Roofscapes® Seed Mixes are custom-mixed seed blends that provide an economical, diverse, and easy-to-install method of green roof planting.

In addition to overall variety and diversity, Roofscapes® Seed Mixes are an ideal choice for overall green roof planting to fill in sparse areas of plug or cuttings installations.

Roofscapes® Seed Mixes can be ordered by the ounce and blended on-site for standard application or pre-mixed in Super Sacks for projects that require quick installation. Mixes are designed for multi-stage establishment, providing full vegetation within two years. We recommend a two-year maintenance plan by a contractor with an intermediate skill level to ensure success.

Benefits

- Inexpensive and easy to convey onto the roof
- Multi-stage establishment; Full vegetation within two years
- Fill in sparse areas of plug or cuttings installations
- Can be ordered by the ounce and blended on-site for standard application or pre-mixed in Super Sacks for quick install projects
- Available in four mix assortments
